CONTENTS

Shocks and singularities in the pressure field of a supersonically rotating propeller. C. J. CHAPMAN *page* 1

Excitation of long internal waves by groups of short surface waves incident on a barrier. YEHUDA AGNON and CHIANG C. MEI 17

Models for very wide-angle water waves and wave diffraction. ROBERT A. DALRYMPLE and JAMES T. KIRBY 33

Bragg scattering of water waves by a doubly periodic seabed. MAMOUN NACIRI and CHIANG C. MEI 51

Similarity solutions for two-dimensional steady laminar gravity currents. P. W. M. BRIGHTON 75

On the changes in the phase speed of one train of water waves in the presence of another. S. J. HOGAN, IDITH GRUMAN and M. STAISSNIE 97

The dynamics of coherent structures in the wall region of a turbulent boundary layer. NADINE AUBRY, PHILIP HOLMES, JOHN L. LUMLEY and EMILY STONE 115

Experimental characterization of steady two-dimensional vortex couples. JEAN-MICHEL NGUYEN DUC and JOËL SOMMERIA 175

Bedload transport of fine gravel observed by motion-picture photography. THOMAS G. DRAKE, RONALD L. SHREVE, WILLIAM E. DIETRICH, PETER J. WHITING and LUNA B. LEOPOLD 193

Surface waves due to resonant horizontal oscillation. M. FUNAKOSHI and S. INOUE 219

Three-dimensional thermal cellular convection in rectangular boxes. K. R. KIRCHARTZ and H. OERTEL 249

Dissipative effects on the resonant flow of a stratified fluid over topography. N. F. SMYTH 287

Plane simple shear of smooth inelastic circular disks: the anisotropy of the second moment in the dilute and dense limits. J. T. JENKINS and M. W. RICHMAN 313

Cyclic recurrence in nonlinear unidirectional ocean waves. PETER J. BRYANT 329

A laboratory study of the minimum wind speed for wind wave generation. KIMMO K. KAHMA and MARK A. DONELAN 339

Minimum-dissipation transport enhancement by flow destabilization: Reynolds' analogy revisited. GEORGE E. KARNIADAKIS, BORA B. MIKIC and ANTHONY T. PATERA 365

A numerical study of three-dimensional stratified flow past a sphere. HIDESHI HANAZAKI 393

Existence and some properties of waves trapped by submerged cylinders. J. A. P. ARANHA 421

Excitation of waves trapped by submerged slender structures, and nonlinear resonance. J. A. P. ARANHA 435

Resonant sound caused by flow past two plates in tandem in a duct. S. A. T. STONEMAN, K. HOURIGAN, A. N. STOKES and M. C. WELSH 455

Linearized dynamics of two-dimensional bubbly and cavitating flows over slender surfaces. LUCA D'AGOSTINO, CHRISTOPHER E. BRENNEN and ALLAN J. ACOSTA 485

The mixing layer and its coherence examined from the point of view of two-dimensional turbulence. MARCEL LESIEUR, CHANTAL STAQUET, PASCAL LE ROY and PIERPE COMTE 511

Thickness noise of a propeller and its relation to blade sweep. R. K. AMIET 535

A note on vortex shedding from axisymmetric bluff bodies. PETER A. MONKEWITZ 561

The structure of a shear layer bounding a separation region. Part 2. Effects of free-stream turbulence. I. P. CASTRO and A. HAQUE 577
